

Hispanic	2061	3413	60.4%	1.66
Native American	597	983	60.7%	1.65
Total	11563	18658	62.0%	1.61

CAL-DOJ- 6 Loci

Group	Frequency	Total	Percentage	Fraction (1 in)
African American	240	2814	8.5%	11.73
Asian	69	596	11.6%	8.64
Caucasian	773	3264	23.7%	4.22
Hispanic	481	1695	28.4%	3.52
Native American	33	118	28.0%	3.58
Total	1596	8487	18.8%	5.32

Harris Cty-6 loci

Group	Frequency	Total	Percentage	Fraction (1 in)
African American	604	6298	9.6%	10.43
Asian	99	1001	9.9%	10.11
Caucasian	1762	6963	25.3%	3.95
Hispanic	1002	3413	29.4%	3.42
Native American	181	983	18.4%	5.43
Total	3648	18658	19.6%	5.11

The bottom line is that the best estimates suggest that more than 3 of every five men would be potential contributors to the DNA on the item in question using the 4 loci with peaks above 100 and between 1 in 4 and 1 in 5 men would be included using all 6 loci with results. I hope this is what you require and feel free to contact me if you have any questions.

William Shields, Ph.D.
 Professor of Biology
 Director of the Honors Program
